

Elizabeth L. Leonard is a clinical and forensic neuropsychologist with research interests in the area of neuroscience and law. Her current work studies the impact of brain injury in individuals involved in tort litigation and neuropsychiatric and developmental disorders in the assessment of defendants in criminal proceedings.

Dr. Leonard obtained her doctorate in psychology with a concentration in developmental psychology from Tufts University. Before focusing on mainly clinical interests, she directed a nationally funded Pediatric Rehabilitation Laboratory at Barrow Neurological Institute in Phoenix where she studied cognitive and motor function in children with brain injury and directed the Clinic for Neurodevelopmental Disorders in the Section of Child Neurology. From 2001-2011, she was on the faculty of the Department of Psychiatry at Harvard Medical School where she continues to be a Member of the Program in Psychiatry and the Law.

Dr. Leonard is a licensed clinical psychologist and maintains a clinical practice focusing on children and adults with developmental disorders and acquired brain injury. Her forensic practice includes expert witness evaluation and testimony for individuals with brain injury, fitness for duty assessments, pre-trial and post conviction evaluations for individuals with brain injury and neuropsychiatric disorders, competency assessments, and consultation regarding psychological standard of care.
